

Memorandum

Date: October 18, 2004
To: William T. Riley
From: Joan Schauer
Subject: Satellite Symposium

I certainly enjoyed meeting you, Ali, and Lisa. Thank you again for all of the work you did to make certain that Dr. Ross' symposium was so successful. By any measurement, *Surgical Management of Melanoma: A Case-Based Approach* was the best satellite symposium I have ever worked on, and I began working on these types of programs approximately eight years ago.

We are taking the new Standards for Commercial Support to our CME Advisory Committee on November 4 and I will be attending the Annual Meeting of the Alliance for CME in San Francisco in January. I will keep you updated on this "turn of events."

I hope that we have the opportunity to collaborate on CME activities in the future.

Attached are the miscellaneous expenses I incurred in New Orleans. If you need additional information, please let me know.
