Dear Ms. Ling,

As the CME provider for the Melanoma Care Consortium project, which is funded by a generous grant from your company, I have had the opportunity to actively participate in the development of the web based meetings, national case driven publications as well as the MelanomaCare.org website to support Melanoma Care Consortium activities.

As you know, this project included very aggressive timelines for completion of project deliverables. To date all project deliverables have been achieved by the timeline established. I want to commend the PharmaDura Corporation for this accomplishment. The timeline and execution of the project was under the direct control of the PharmaDura Corporation who acted as our educational partner in this project. As you know, the project undertaken was quite complex and required coordination of multiple educational methodologies in addition to a large multi-disciplinary planning group. This strategy, although complex, promises to offer superior outcomes in terms of learner satisfaction and overall reach to a nationwide audience.

I have worked personally with this project, due to its complexity, and have been greatly impressed by the capabilities of the PharmaDura staff related to planning and execution. I find their communication and knowledge of medical education to be outstanding. They follow through on all project elements and have produced a high quality product as a result of this and their capabilities.

My organization will be very interested in working with PharmaDura in the future and are quite proud of the project accomplishments to date.

Thank you again for your support of this project.

Sincerely,

Rebecca Zukowski

Director, Continuing Medical Education
